

INDEX

- absorbance
 - induced, definition, 28
- absorbance change
 - definition, 14
 - isotropic, 15
 - measuring, 24
- absorbance, definition, 13
- activation energy
 - autodissociation, 99
 - reorientation, 74, 76, 78, 80–81
- adiabatic approximation, 89
- anharmonic redshift, 28
- Arrhenius equation, 74
- artifact
 - coherent, 29
 - cross-phase modulation, 29
- asymmetry of transient spectra, 87
- autodissociation of water, 97–100

- background from pump stray light, 75
- BBO, 19
- beam angle, effect on time resolution, 25
- birefringence of sapphire, 23
- bleaching, definition, 28
- blueshift, 47
- Brownian oscillator
 - distribution of, 63–65
 - model, 53–55

- Cavendish, 10
- cm^{-1} , conversion, 102
- coherent artifact, 29
- compressibility of water, 68
- correlation time
 - rotational, 15
 - spectral
 - HDO:H₂O, 58
 - NaOX solution, 67
- cross-correlation function, 26
- cross-phase modulation artifact, 29
- crossection of HDO, 16

- Debye time, 73
- Debye-Stokes-Einstein equation, 73
- $\Delta\alpha$, *see* absorbance change
- deuteron transfer, 70–71
- difference-frequency generation, 18
- diffusion equation
 - heat, 34
 - numerical solution, 85
 - reorientation, 83
 - spectral (in potential), 83
- diffusion equation, spectral (in potential), 94

- energy-gap law, 57
- error margins, notation of, 15
- experimental setup
 - pump–probe, 23–25
- experimental setup, photo, 9

- fractional power law, 74
- FTCS algorithm, 34
- FWHM, definition, 20

- geometrical factor (ξ), 14
- geometry of overlap region, 24
- germanium
 - for pulse characterisation, 26
- Grotthuss, 98

- HDO in D₂O, reason for use, 15
- HDO, crossection of, 16
- HDO:D₂O, IR spectrum, 13
- HDO:H₂O, IR spectrum, 51
- heat diffusion equation, 34
- heating of sample
 - accumulated, 33
 - one pulse, 23, 33, 55
- homogeneous broadening, 27
 - by fast modulation, 28, 69
 - in HDO:D₂O, 69
- hydrogen-bond network, picture, 10

- ice, 42
idler (in OPG/OPA), definition, 19
induced absorbance, definition, 28
inertial shift, 97
instrument function, 26
 convolution, 27
intermediate-state model, 43–46
isotope effects on vibrational dynamics,
 50–58
isotropic absorbance change, 15
- Kerr effect, 74
KTP, 19
- Laenen, *see* coherent artifact
Lavoisier, 10
lifetime
 dependence on frequency, 48, 63
 fast component in NaOX solution,
 65
 hydrogen-bond excitation, 49
 OD stretch in HDO:H₂O, 56–57
 OH stretch in HDO:D₂O, 44
- magic angle, 15
molecular dynamics simulation
 autodissociation, 100
 NaOH solution, 61, 70
 reorientation, 81
motional narrowing, 69
movie camera, 13
- NaOX
 IR spectrum, 59–60
NMR, measuring reorientation with, 13,
 73, 81
noise suppression, 30–33
- Ockham's razor, 67
optical parametric amplification, 19
optical parametric generation and am-
 plification, 18
orientational relaxation
 HDO:D₂O, 73–85
 NaOX solution, 68–69
overlap region, geometry of, 24
overtone spectrum, 91
- phase matching
 condition, 19, 36
 four-wave mixing, 37
 types, 19
phlogiston, 10
proton transfer, *see* deuteron transfer
pump–probe spectroscopy
 principles, 13–15
 setup, 23–25
- redshift, 48
relaxation time, *see* lifetime
rotational anisotropy
 HDO:D₂O, 75
 measurement, 31
 NaOX solution, 68
rotational correlation time, 15
- sapphire, birefringence of, 23
second-harmonic generation, 18
signal (in OPG/OPA), definition, 19
signals, magnitude of, 16
solvation shells, 59
spectral correlation time
 HDO:H₂O, 58
spectral diffusion
 in harmonic potential, 53, 83
spectral diffusion, in potential, 94
spectral hole, 63
Stokes shift
 for harmonic potentials, 53
sum-frequency generation, 18
 for pulse characterisation, 26
- thermalization of vibrational energy, 55
time resolution, effect of beam angle, 25
TOPAS, 20
transient spectra
 asymmetry, 87
 HDO:D₂O, 88
 NaOX solution, 62
transient spectra, calculation, 91–92
two-state mixture model, 11
- ν , use of symbol, 15
vibrational modes of water, 11, 12, 48
vibrational relaxation

- HDO:D₂O, 41-49
- Voigt lineshape, 70

- water (H₂O), IR spectrum, 12
- water vapor, IR spectrum, 12
- wave number, conversion, 102

- zeolites, 57
- zero point, deviation in germanium, 27
